DYNACOOK

Where passion meets creativity

Our company is based on our three prominent values: credibility, innovation and efficiency. This is why we believe in the product we give you.

Out of the over 43 years of DYNAXO, we dedicated 18 to study the “gas under glass” technology. Our efforts, endless enthusiasm and desire to grow have produced premium cooktops, which are now also available in versions adapted for use in yachts and campers.

We believe that the DYNACOOK ceramic gas cooktops offer not only cooking convenience, but also the amazing history written by DYNAXO and the wonderful adventures, which will be written by the users of our cooktops during their journeys. We want you to follow your style, no matter where you are.

Visit our world. A world of passion, flavour, family time, development, and positive emotions.
A world where you will meet the DYNACOOK ceramic gas cooktops developed by DYNAXO, a family business.

Małgorzata Brzóska-Nowak & Paweł Nowak
CEOs

DYNACOOK

A gas stove, which is a ceramic cooktop.

The DYNACOOK ceramic gas cooktops allow for convenient and safe cooking wherever you are. Safe, environmentally friendly, easy to use. As the burners are located under the ceramic surface, the cooktops are both tasteful and functional. They support all types of gas to provide their users with freedom both in and out of home.

To satisfy the expectations of our Clients, we have released Camper & Yacht versions of all X-series gas cooktops. The cooktop is easy to keep clean and the control panel is easy to use, which means that you can focus on the most important thing – exploration.

This is a proven concept of a ceramic cooktop, which cooks on gas and uses trace amounts of electricity. DYNACOOK is a 100% Polish product, designed and manufactured with top quality components.

X2 mini C&Y

NEW!

EVEN MORE COMPACT

The X2 mini is expertly adapted to meet the needs of travelers, offering efficient, versatile cooking wherever you go. Thanks to its small size, it can be installed as close as 20 mm from the wall to save precious kitchen space. The cooktop can even be connected to small gas cartridges. As it is easy to use, does not produce an open flame, and economically consumes any type of gas, the X2 mini model is the perfect solutions for yachts and campers.

ACCESSORIES

ADD-ONS THAT WORK TO YOUR ADVANTAGE!

Check the accessories dedicated to Camper & Yacht series cooktop. Stylish, practical and comfortable. Thanks to the covers, you can create additional working space and the handles allow you to keep pots in place while cooking. Perfect solutions when conditions change during a yacht trip and you feel like drinking hot coffee...

OVERLAYS

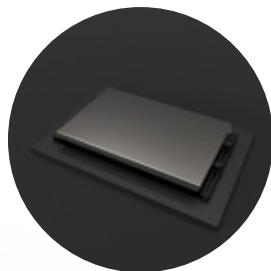

A technical element that is also aesthetic! Choose a color* that will perfectly fit your space.

*only for X2 C&Y and X3 C&Y

COVER OF X2 mini C&Y

A practical cover for your X2 mini C&Y made of noble stainless steel and anodized aluminum. It allows you to cover the hot cooktop and also provides a convenient additional worktop.

AUTO OFF FUNCTION

Additional cover function: if you forget to turn off the cooktop, closing the cover will do it for you! In addition to covering the hot surface and additional countertop space, you gain a guarantee of safe use of the cooktop in a small space.

POT HOLDERS

Tailored to your model. They protect pots and dishes from moving during cooking.

X2 mini C&Y

X2 C&Y

X3 C&Y

FURNITURE PARTITIONS*:

For your convenience and safety, you can equip your cooktop with a factory furniture partition made of galvanized steel, which will separate the cooktop from the contents of the cabinet or oven that may be located under the cooktop.

*only for X2 C&Y and X3 C&Y

Focus on savings and safety

Combustion of **gas “under glass”** means that there is **no open flame**. Together with the extra safety systems, this makes the DYNACOOK **extremely safe to use in travel**.

As the burners are located under the ceramic surface and the gas is combusted in very high temperatures, no oily residue will appear on your furniture and cleaning of the cooktop itself is much easier as there are no protruding grates or burners.

When choosing gas, we are choosing a natural source of energy, which - thanks to our technology - is being used in a very efficient manner. The high temperature produced by the catalytic burners will heat up your pots quickly, which means that you can switch to a lower power setting - consuming less power - sooner. The heat accumulation lets you cook longer on lower settings, which is definitely more efficient.

This catalog is not an offer within the meaning of the law. We pursue a policy of continuous development and improvement of our products. We reserve the right to change technical parameters of the offered equipment without prior notice.
